Summary

Full-Stack Engineer with hands-on experience building and deploying production-grade web applications end-to-end. Skilled across React, Node.js/Express.js, FastAPI, and MongoDB/PostgreSQL, with strong exposure to REST API design, RAG/AI pipelines, and clean architecture from database to deployment.

Education

Chandigarh University, Mohali

B.E. in Computer Science and Engineering

CGPA: 7.8

2022 – 2026

Experience

Web Development Intern

May 2026 – Jun 2026

InAmigos Foundation

Remote

- Owned end-to-end design and development of new webpage layouts from company requirements, translating specs into clean, production-ready HTML/CSS/JS interfaces deployed live.
- Audited the existing website's UI/UX top to bottom, identifying and fixing structural and visual inconsistencies that were directly hurting user experience and site credibility.
- Re-engineered core pages for full responsive behavior, eliminating layout breaks across desktop, tablet, and mobile — delivering a consistent experience across every device class.
- Drove structured QA and iterative refinement cycles in collaboration with the team, catching UI bugs pre-deployment and tightening design-to-code fidelity.
- Delivered a full page-by-page UX audit with actionable recommendations, several of which were adopted directly into the site's design guidelines.
- Operated independently in a fully remote setup, managing deliverables and turnaround end-to-end without in-person supervision.

Projects

VideoIQ – AI-Powered Video Performance Auditor *(React, Vite, FastAPI, ChromaDB, RAG, SSE, Apify)*

Live

- Built a production RAG dashboard for side-by-side YouTube vs. Instagram Reel performance audits, concurrently fetching metadata via YouTube Data API v3 and Apify and indexing it into a persistent ChromaDB vector store using BAAI/bge-small-en embeddings.
- Engineered a real-time streaming AI chat (SSE) with session-isolated RAG retrieval, cited source chunks, and pre-loaded one-click analysis prompts for instant insight.
- Deployed full-stack on Vercel + Render with multi-layer fallback systems to handle YouTube/Apify rate limits gracefully in production.

Fruitora – Full-Stack Nutrition Platform *(React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS)*

Live

- Built a full-stack nutrition platform with JWT authentication, live USDA nutrition API integration, Chart.js analytics, and Leaflet-based location-aware interfaces.
- Designed 12+ protected REST routes backed by MongoDB Atlas covering recipe recommendations and an admin analytics dashboard; deployed on Vercel + Render with CI/CD.

Product Streamer – Cursor-Paginated Product Browser *(React, Node.js, Express.js, PostgreSQL, Neon)*

Live

- Implemented keyset (cursor-based) pagination over 200,000 products using a composite (`created_at`, `id`) index, replacing slow OFFSET-based scans with $O(\log N)$ page seeks at any depth.
- Designed opaque, base64-encoded cursors and validated correctness with a concurrent-write test simulating live inserts mid-pagination, confirming zero duplicate or skipped records across 10,000 pages.
- Deployed the backend on Render with a pooled Neon Postgres connection and the frontend on Vercel, with infinite-scroll browsing via IntersectionObserver.

TaskPulse – Task Management App *(React, Node.js, Express.js, MongoDB, JWT)*

GitHub

- Built a full-stack task management app with JWT auth, bcrypt password hashing, and role-based admin/user access via MongoDB/Mongoose.
- Implemented rate-limited REST APIs with Swagger documentation for endpoint discoverability and admin task oversight.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++, C, SQL, HTML, CSS, PHP

Frontend: React, Vite, jQuery, Bootstrap, Tailwind CSS, Chart.js, Leaflet, Responsive Design, UI/UX

Backend & APIs: Node.js, Express.js, FastAPI, Flask, REST APIs, GraphQL, JWT Auth, SSE Streaming

Databases: MongoDB, Mongoose, PostgreSQL, ChromaDB

AI & ML: RAG Pipelines, OpenAI Whisper, Sentence Transformers, Vector Embeddings

Tools & CMS: Git/GitHub, Vercel, Render, Neon, CI/CD, WordPress

Certifications

Coursera: 4G & 5G Fundamentals · Intro to AI · Big Data Analytics · Cybersecurity Basics · Industrial IoT · Java Full Stack Developer **NPTEL:** IoT (78%) · Cloud IoT Edge ML (70%) · Multi-Core Architecture (68%) · Foundations of Cryptography (70%) **Infosys:** Cloud Computing **IBM:** Introduction to Artificial Intelligence
